affumicato

While most grey marble colors are dull, boring and just plain overused, Affumicato stands out remarkably from the rest. The darker grey veining and warmer earth tones bring a deeper dimension to the marble that provides a lovely upscale backdrop for any architectural design.

lilac

Instead of the stark white color trend of 2019, try designing with TEMMER's versatile Lilac marble. Our Lilac marble is named for the playful undertones of lilac but the versatility comes from the black and grey veins with hints of light brown scattered throughout.

starlica onyx

TEMMER's Starlica onyx is so bold and fun that it will definitely be the focal point of your design and spice up any room. Starlica's peach colors contrast and play against the white and grey colors beautifully. A bright onyx like Starlica pairs well with a softer color marbles like Affumicato.
