BORDER DRAIN TACTILE TILES

Aesthetic and always strong... TEMMER offers special production options in special sizes for all designs and applications.

WALL STONES

Aesthetically pleasing, full of character and always glamorous. Gardens can be stylishly surrounded and structured with natural stone walls. TEMMER is an expert in the production of split-edge or cut type wall stones with desired dimensions, desired surface properties. Whether designers want to use urban furniture or build a stone wall for every corner of the outdoor space, TEMMER's tips and suggestions will help them with any special design.

FIRE PIT

Fire pit patio sets can be a stylish addition to outdoor spaces. Matching furniture and accessories give a finished look to the patios. Create the feeling of sitting around in the campfire in wood Adirondack chairs. If designers don't want to distract the beautiful scenery beyond the patio, they look for in-ground fire pit ideas. Cozy gathering spots can provide a crackling fire and allow an unobstructed view at the same time.

POOL COPINGS

Pool coping is available in several finishes or profiles to suit a variety of needs and tastes. Choosing natural stone pool coping provides you, your family, and your guests with both safety and beauty. Although safety always comes first, it's nice when it brings an attractive design along with it. TEMMER has some stunning natural stone options ready to grace the contours of your pool.
